PROFESSIONAL SUMMARY

My main goal is to work with extremely talented people and collaborate to create products that make an impact and generate real value. I like to manipulate software that adds to my knowledge and creates positive engagement among my colleagues.

I always work focused on the most important task without ignoring the deadline for other demands, which I believe is an important skill for assertive deliveries.

I lived in Canada in 2018/19, which reflected in my decision to apply for an international job. I am optimistic to make a solid contribution and hope to meet you soon.

WORK EXPERIENCE

Custom Software Engineering Analyst   Aug 2021 – Present
Accenture Brazil • Belo Horizonte, Brazil

I am a reference for other intermediate developers as I have already been a tech-lead. I worked on projects in sectors such as finance, retail, cosmetics, design and others.

   • In the Television System project, I became a reference in the development of video players for the web, creating a npm package integrated with React.js and Google Shaka Player.

• In the project where I was technical leader, together with my team, we were world champions at the Accenture internal event – 360th Value Awards.

My skills developed at Accenture are **Typescript, Node.js, Nest.js, Prisma.io, Object-oriented programming (OOP), Next.js, Shaka-Player, Git/GitHub, Serverless as a Framework, React e React Native, Tailwind e RadixUI.**

Software Developer   May 2021 - Aug 2021
VP6 TI Consultancy • Belo Horizonte, Brazil

I implemented screens and functionalities dedicated to the needs of clients in the financial, administrative and construction sectors. This was my entry into the market and whenever possible, I worked in pair programming with a colleague.

• On the front-end I developed with Typescript, CSS, Umi.js, Redux, Context api and some frameworks such as Bootstrap and React/ReactNative.
• On the back-end I worked with Python, Django, Pandas, integrated with SQL and NoSQL databases.

EDUCATION

Web and Mobile Development   Jan 2020 - Apr 2021
TRYBE • Belo Horizonte, Brazil

In Trybe's intensive training in Web and Mobile Development, the objective was to learn in a comprehensive way and with a lot of practice (more than 1500 hours) the technical and behavioral skills most demanded by the market

at that moment, combined with individualized professional guidance to take the first steps in a technology career.
